

# Attention PTs, PTAs and ATCs

## The Missing Link

**Sign up for this hands-on, interactive two-day seminar that will help you:**

- Improve clinical effectiveness
- Solve complex biomechanical problems
- Prevent recurring injuries
- Get to the "root" of the problem
- Devise strategic treatment programs
- Prescribe exercises with a purpose
- Greatly reduce treatment time

**Topics to be presented include:**

- Biomechanics of human movement
- Anatomical links from head to toe
- Performing a functional evaluation
- Evaluating and Treating the Functional Shoulder (Lecture/Lab)
- Evaluating and Treating the Functional Lumbar Spine (Lecture/Lab)
- Evaluating and Treating the Functional Knee (Lecture/Lab)

This course is designed to give the participant an opportunity to explore a variety of treatment options. Manual therapy techniques, exercise prescription and case studies will be included in discussion and lab sessions. Upon completion of the course, the participant will be able to utilize a new way of assessment and thinking in the treatment of a variety of orthopedic conditions.
